

Watertight Mesh Certification Link

Posted by guido.salimbeni - 2014/01/08 15:31

I would like to introduce our Beta Service called Watertightmesh Certification . Please visit our website www.watertightmesh.org

The WMC (Watertight Mesh Certification™) is a product qualification label that certifies the 3D model has passed visual and automated tests that meet specific qualification criteria in the list of model requirements published at watertightmesh.com.

The WMC logo is a certification emblem that guarantees the buyer that the 3D model they are looking at is ideal for 3D printing. It provides assurance to anyone passionate about 3D printing, using purchased models; and provides special certification to validate the work of freelance modelers, which gives the whole 3D printing market greater transparency and visibility and allows the market to produce the highest quality products with the greatest efficiency.

WMC is the number one resource for 3D Modelers to seek new job opportunities and gain greater visibility and market exposure. Please join the site here <http://www.watertightmesh.org/register/>

Kindest regards.

Guido Salimbeni

3d modeler at www.3dsmithery.com and founder of WMC
