

Netfabb New Version 4.9 Released

Posted by Marco CM - 2012/03/22 10:55

Now its even easier to quickly clean-up and prepare any 3d model for 3d print. Check out this link to the new updated Netfabb

Netfabb Studio Professional is an advanced software for 3D Printing and Additive Manufacturing. It bridges the gap between CAD and machines by providing the tools you need to fix and edit your files to take control of your data and prepare buildable files.

Fixes and functional improvements includes:

- improved triangle reduction
- improved smoothing
- updated license dialog to warn for licensing or dongle issues
- interlocking test analyzer
- performance improvement for 3D packing
- GUI-Fixes for MacOS
- NCM support for file preview browser
- SLC Import fix
- Screenshots
