

Mechanical engineer for toys development

Posted by andradebh - 2013/02/21 12:14

I am looking for a mechanical engineer with good experience in toys development.
The main part of the job, is to receive 3D STL / OBJ files and make the structural adjustments like:

- battery`s compartment, screws positions, separate the injection parts.. etc.

If there is any person or company suitable for that I would be glad to receive some suggestions.
