

How to Recover QuickBooks Company File Password?

Posted by ContactQuickBooks - 2019/07/12 03:25

If you forget your QuickBooks company file password, you can use the Automated password reset tool to reset the password. To execute the steps, you can follow the steps mentioned below:

- Open the QuickBooks desktop company file and then update it to the recent version
 - Now once you have downloaded the QuickBooks update, type the Token number that you have received in your email.
 - Choose the QuickBooks version and search for the company file for which you wish to reset the password
 - Provide a new password in the required field and then type it again to Confirm it
- If the given solutions do not prove effective, then feel free to contact the experts at QuickBooks customer care number.
