

Checking file - What does this mean?

Posted by nateowens - 2012/08/24 07:24

A quick question...

My file checks ok for watertight

But... I get this flag

I don't have a clue what it is referring to or how to fix it?

See attachment <http://www.kraftwurx.com/images/fbfiles/images/WarningCoordinates.jpg>

It seems this a legacy issue of sorts. There is a point on the model at exactly 0.0 coordinate. Or perfectly centered. This should not be an issue for 3d printing. Will the model upload to Kraftwurx.com?

-Marco
