Bloodstained resembles a lot with Castlevania: Symphony of the Night and thus providing the fan with nostalgic fun. Those who are not aware of this game, Bloodstained is a Metroidvania video game whose story depicts about Miriam, who is a Shardbinder and can use the power of dead monsters. The objective of the game requires the player to stop Gebel, who is also a Shardbinder and intends to take revenge from the alchemists of England by taking favours from the demons. Although every bit of Castlevania is similar to Bloodstained but the ending of Castlevania is original, whereas Bloodstained ending is quite bad.
