

Location of Fortnite Foraged Items: Mushrooms, App

Posted by marierobert8168 - 2020/02/12 00:55

In battle-royales like Fortnite, you have to keep your health level balanced. For that, you have to consume different fruits and vegetables. Now, you can collect these items in one banner, Fortnite Foraged Items. These food items can be consumed by the player to increase the health level. These spawn in very specific places on the Fortnite island. When you munch these, you will observe the increase in the health or the shield (depends upon the items you chomp), which will ready you for the next bout of Battle Royale.
