

## Services included under Networking Infrastructure

Posted by advsoft - 2020/03/27 05:18

---

The network infrastructure basically includes the hardware and software that your company uses to ensure your business runs smoothly. AdvSoft LLC is a top-class IT company that provides a range of services to manage and maintain your network infrastructure. Here's a look at some important Networking Infrastructure services:

- Patch management to ensure your business software is up-to-date.
- Active Directory service to monitor and manage credential and access rights
- Dynamic Host Configuration Protocol and the Domain Name System services
- Remote access VPN to establish a secure connection within the business network.

If you want to learn more about network infrastructure services, you can visit the AdvSoft website or get in touch with a customer service representative.
