

How to Turn Off Clear Browsing Data History in Win

Posted by marierobert8168 - 2020/04/08 00:15

In this socially connected world, our gadget is also connected, and sometimes it becomes a sharing device with other users, be it family, colleague, or friend. In this case, it becomes necessary to maintain Privacy on our device that we use to know what other users use and which website they use to visit. It may also be possible that they are visiting your own website account, and thus this knocks your Privacy as your personal data is also stored on your device.
