I have a basic necessity of a top-quality and advanced printing machine for printing the documents. I am a computer user, hence having a printing machine is really very important for me. Printer plays a big role in completing the printing needs in the proper ways. Initially, I have opened this link in the preferred browser and click on “download “option. I am following all the displayed instructions for completing the printer set up file. After this step, I am getting problems for setting up HP printer using 123.hp.com. Can you suggest easy ways for HP printer setup?
