_____

The very first thing the user needs to do is to create a Bellsouth account, this will ask you for the login credentials, such as the email id address and the valid password. This credentials must be correct, Any of the wrong attempts will stop you to access the BellSouth email login page. Follow these simple steps.

 Go to any of the web browsers, in the URL address bar BellSouth email login page.
 Enter the email address and the password.
 It might ask you about the name with the middle name and the surname.
 Set incoming mail server, as the POP3.
 Now, everything has been done.
 The last step is to click on the finish button to complete Bellsouth Login process.
