

Thinking of posting in seller section

Posted by nateowens - 2012/08/12 10:36

I've had some done in the ZCorp process elsewhere

More interested in resin with a bronze patina

I see. We have a giant selection of materials. They are all naturally a solid color. For a high detail statue. I would recommend the Sub-surface family of materials. Such as Sub-Surface Vero White, Vero Grey, Vero Black etc. These materials come close to traditional sculpting resins texture and can be primed and painted with outstanding results.
