

Search engine for 3d printing files and objects

Posted by lexington - 2012/12/21 10:03

Hi all,

it seems to get increasingly difficult to have an overview of the files and objects that are available on the web (besides the big marketplaces as Kraftwürx, Thingiverse etc.)

We created a free search service fabforall.com (at the moment in public beta) that allows to search all the marketplaces at once. The accounts are in development but will be better over time.

Now we are looking forward to the feedback and ideas from the community - do you find it useful? What is missing?

Thanks for this!

:)
