

Searching Mechanical engineer for toys development

Posted by andradebh - 2013/02/26 08:16

I am looking for a mechanical engineer with good experience in toys development.

The main part of the job, is to receive 3D STL / OBJ files and make the structural adjustments like:

- battery`s compartment, screws positions, separate the injection parts.. etc.

Hi admin,

The cocreate posting has not been working for us for the past week or so when we've tried it - On FF, Chrome and IE, 2 separate comps, 1 Win 8, 1 Win 7. We've brought this to Marco's attn, too. Any progress updates?

Until cocreate is working, is there a section of the community forum we could use to post our opportunity?

Thanks and Regards,
Heather and Joe

Hello Heather and Joe,

We are working asses all issue with Co-Create. In the meantime please email me the job directly to marco@kraftwurx.com. We provide design services and might be a fit for your project.

-Thank you,

Marco V
