

## Kraftwurx 3D Scanning Services

Posted by Marco CM - 2014/04/01 16:44

---

Kraftwurx.com not only provides 3d printing services but also offer limited 3D scanning services. We use the NextEngine desktop 3d laser scanner system along with the multi-drive for complex model shapes. This laser scanner is capable of capturing full 32 bit color and details down to 0.4mm. Below are some photos of a model during the scan process and the resulting 3d geometry. Email [support@kraftwurx.com](mailto:support@kraftwurx.com) for details on 3d scanning services.
