

How To Set Live Wallpapers On iPhone?

Posted by carlsmith - 2019/04/17 11:01

By changing the wallpaper of your iPhone, your device gets a new fresh look. And if it is Live Wallpaper, then it becomes more attractive. A Live Wallpaper is a kind of a wallpaper that includes movement to not just home screen but also locks the screen of your iPhone. In this blog, we will explore the process of setting live wallpapers on iOS.

Make your iPhone more attractive

The method of setting up Live Wallpapers and Dynamic Wallpapers

Firstly, click on Settings.

Then, press on Wallpapers.

After that, select New Wallpaper.

Next, press on Dynamic or Live. Select the one that you wish to have.

Then, click on that for which you would wish to view on a fullscreen.

If you want the Live Wallpapers, long press on display for viewing it animate. Note that if you wish to get a Dynamic Wallpaper, then you need to wait some time for it to get animated.

As soon as you get the one wallpaper that you like the most, click on the Set option.

Select the way you are going to use wallpaper by clicking 'Set Lock Screen', 'Set Home Screen', or else 'Set Both'.

The method of using Live and Dynamic Wallpapers on an iPhone

After you are done setting up the wallpaper, go through the given below instructions properly.

Firstly, you need to lock the iPhone. This can be done by tapping on/off switch. It shall be towards the above on the right-hand side. It does vary according to the version of the iPhone.

Then, click on display for waking the iPhone. You do not need to unlock it.

The method of using Live Photos as Wallpaper

Firstly, go to Settings.

Then, press on Wallpaper.

After that, click on New Wallpaper.

Next, press on Live Photos album.

Then, click on a Live Photo for choosing.

After that, press on Set.

Lastly, press 'Set Lock Screen,' 'Set Home Screen' or else 'Both.' This selection depends on the location where you wish using the picture.

Note that you need visiting Home or Lock screen for watching wallpaper that you set. As it is a Live Wallpaper and not the Dynamic one, so it is going to animate on Lock screen only.

Remember! You can create video wallpapers by using custom videos that you record on your phone.

This is amazing stuff to try out.
