

Fix slowness, crashing, error messages in FireFox

Posted by mozillausa - 2019/05/31 02:11

Thunderbird Technical Support Number

If you are encountering the issue of your Firefox functioning slowly, crashing frequently and coming across several error messages, then this could cause a lot of problems for the users. These issues are easy to solve once you understand the reason for encountering this issue. The steps that you can take up are as stated below:

- Ensure that the connection settings on your Firefox browser have been accurately set.
- Make sure that you configure the Windows Firewall so that it would not block Firefox from accessing the internet.
- Also, use an alternate browser to ensure that you can access the internet.
- There are chances that you would face this issue because you are using an outdated version of the Firefox browser.

If you find that you are unable to solve the issue using the given steps, then the last option that you would have is to connect with professionals using the Contact Number of Mozilla. They would ensure that you can solve the problem at the earliest.
