Start MS Office Setup from office.com/setup
Posted by maryrosss333 - 2019/10/16 18:34

_____

If you have an existing Microsoft Office account, then you can just proceed by submitting your valid login credentials. If you do not have an existing Microsoft account, then create one. If you have your product key and you want to activate and set up the Office, then you need to go to office.com/setup and install the setup. Just wait for a few moments and the installation process will start automatically.
