How to fix 'Norton not installing on Mac' problem?
Posted by PeterParkerX - 2019/12/15 21:48

_____

If it is getting difficult for you to install Norton on your Mac, it means you might not be using the correct steps to do it. Have a look at the given process to complete the installation process successfully:
• Visit the official website of Norton and enter your login credentials
• Click on 'Get started' and then 'Download Norton.'
• Further tap on 'Agree and Download' to accept the terms and conditions.
• Click twice on the Norton product installer and choose 'Agree and install.'
• Provide your admin account password and go to 'Install Helper.'
• Click 'Allow' if you see a message indicating 'System software was blocked from loading.'
• Follow the steps popping up on the screen.
If these steps didn't help you out, reach out to experts at Norton support to find a more straightforward process.
