

Kraftwurx & Autodesk Joining Forces

Posted by Marco CM - 2012/05/03 16:30

This up coming Meet-up will be very interesting. Kraftwurx will be merging it's meet-ups with the first Autodesk Users Group meeting for the Houston Chapter. We plan to have NASA speaking on flight simulation technology and CG Artists/Animator Josh Burton of Katy Texas to speak on his Setup Machine Rig.

We will set aside a portion of the meeting for artists to present their portfolios and examples of work. Along with a networking meet and greet. RSVP here:
