

How can it weigh 58 pounds?

Posted by nateowens - 2012/08/12 10:59

http://www.kraftwurx.com/components/com_virtuemart/shop_image/product/70-166.jpg

This is not mine, I'm new here and thinking of posting in the seller section and a bit confused about some of the samples posted - this item is small, two inches or so, but the description says it weighs 58 pounds

It is a Hippo what do you expect? LOL, Just kidding. We are having our development take a look into this error. The model is in the site at the proper scale. It is just reporting an incorrect figure.
