

An add-on paste extruder for FDM 3D printers

Posted by jjmardlin - 2014/06/25 16:19

For printer services who are looking to differentiate, an opportunity to work with a range of new materials could be very valuable.

We've recently launched our Discov3ry paste extruder add-on, an affordable way to expand desktop FDM printers to many new paste materials. Happy to answer any questions.
