

### NOTE:

This article provides general information about volume discounts. If you have additional questions, please do not

Volume discounts on kraftwurx.com are handled differently than normal orders. Depending upon the category from which you order products, different volume discounts apply. Minimum order quantities for each store category apply. This means that in Jewelry for example; you will have to order 10 or more items before a volume discount is applied. In other categories, you may have to order far more units before the volume discount is applied. In Christmas Ornaments for example; volume discounts are not applied until you order 50 or more units.
